July 2025 Issue

**Barbara Jorgensen**  
**Marjorie Kaltenbach**

From your friends at

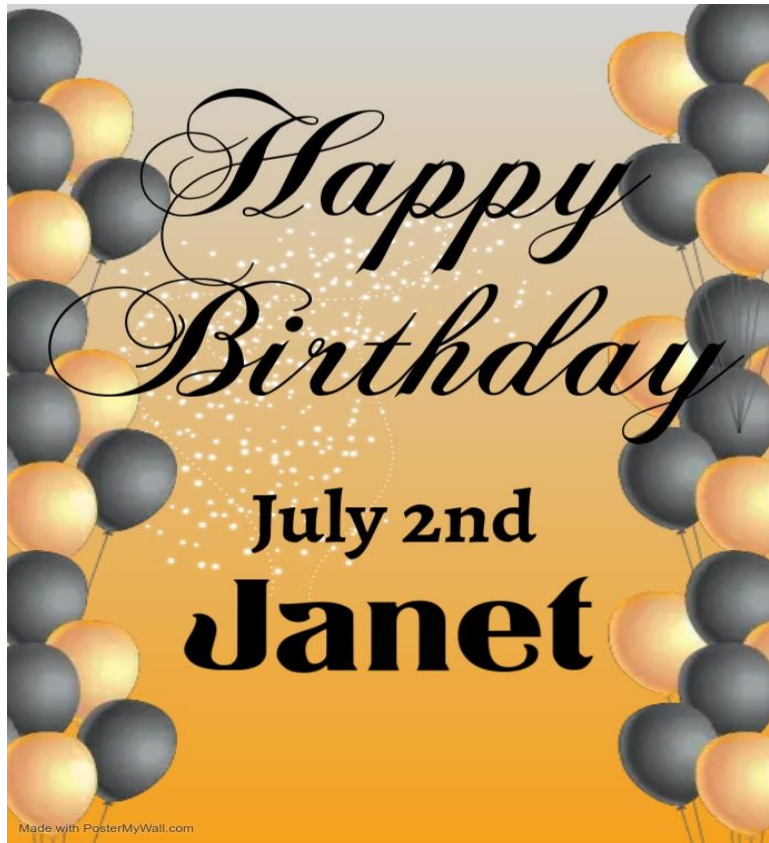

July is the seventh month of the year in the Julian and Gregorian calendars. It falls in the middle of summer and is usually the hottest month of the year in the northern hemisphere. In the ancient Roman calendar, which began the year with March, July was the fifth month, known as Quintilis. When January and February were added to the calendar, Roman Emperor Augustus changed the name to Julius in honor of Julius Caesar, who was born in July.
